HAMMERHEAD SIDEMOUNT SYSTEM

Never Dive with a Tank on your back Again!

The Hammerhead Side Mount System is diving at its most free. With unencumbered mobility our side mount system gives you freedom in the water like you've never felt before.

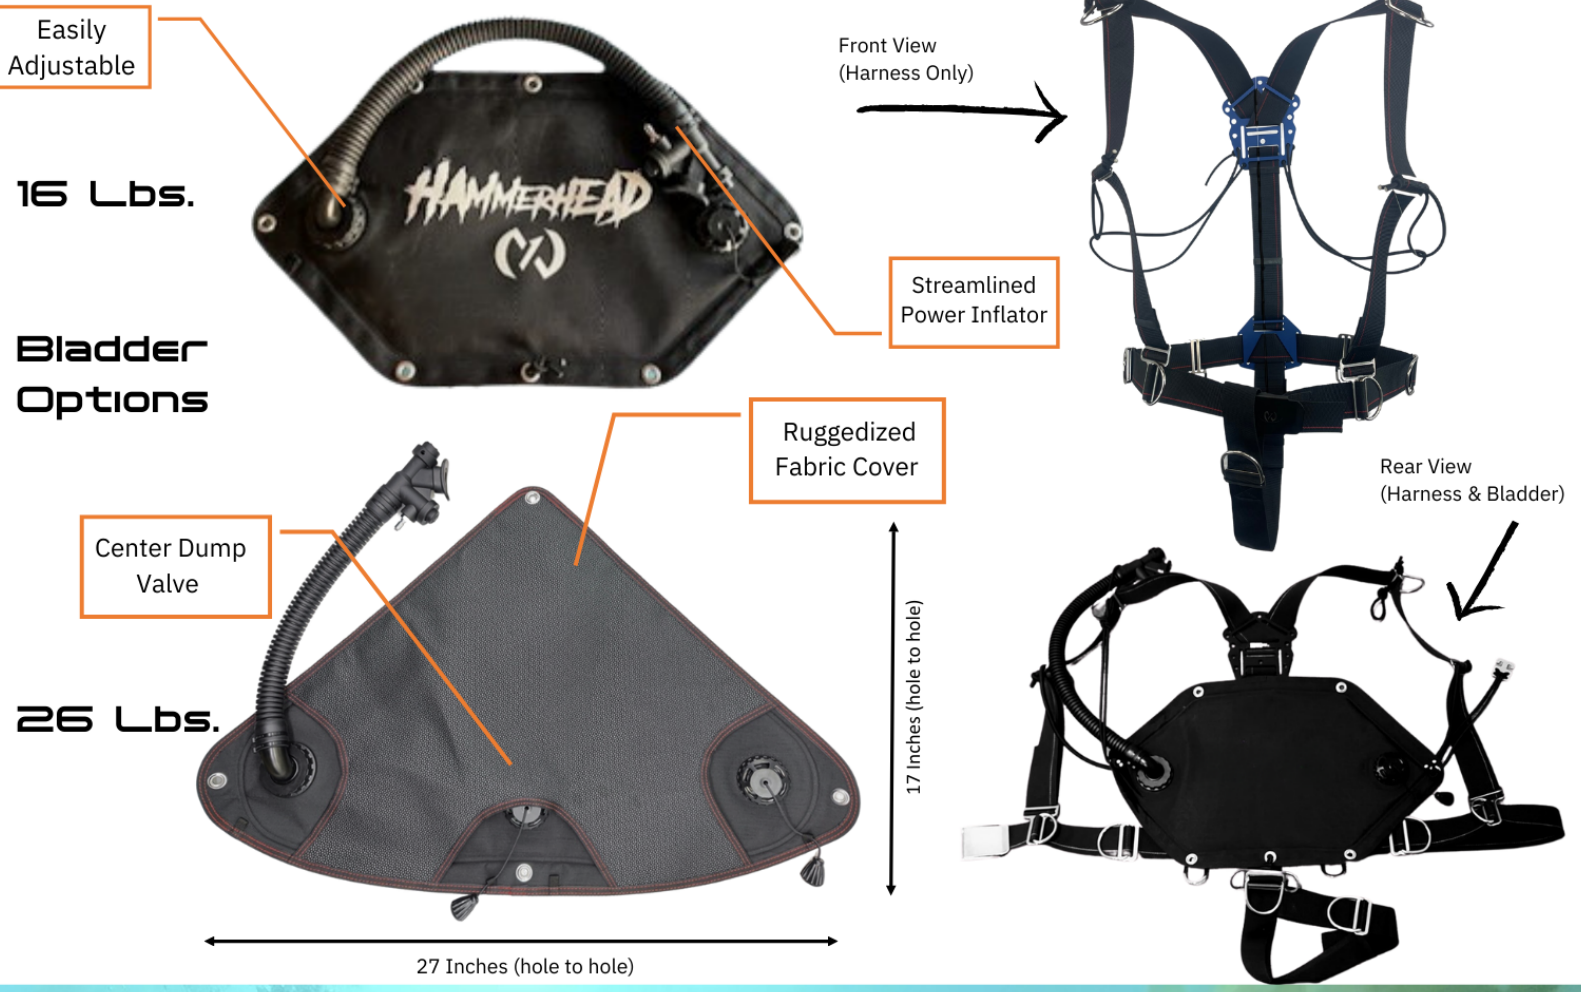

The harness comes with a shoulder & lumbar plate, connected with rugged cordura webbing. Bungee and clips secure your tank(s) to you, allowing the diver to be free from their heavy tank.

**Harness only:
\$749.98**

**Harness w/16#:
\$949.98**

**Harness w/26#:
\$1,099.98**

This side mount system is tailored to the diver, with every part of the harness being adjustable. There are two bladder options; the smaller 16 Lbs. vs. the larger 26 Lbs., giving the diver options between a truly streamlined 16 Lbs. buoyancy option and the larger, still incredibly trim 26 Lbs. The larger bladder has a rough scratch/puncture resistant cover (pictured above) that's perfect for protecting your bladder in caves, wrecks, and other tight squeezes while diving. This gives you peace of mind when diving in highly technical areas. Dive to your hearts content with this NEXT level BCD system.

Leatherback B.C.D System

Dive like a Turtle with our leatherback B.C.D. System. Exceptional design, top notch materials, and hand made in Monterey, California, this set-up is your NEXt and last B.C.D.

Wing Option	Price
